Dial-Up Connection Instructions

How do I setup my Internet and Dial-Up Account on my computer?

Win95/98/2000/ME

Instructions for changing password

For Security and Privacy, all NTA Internet customers are required to change their current password to a new one. You can change password anytime. It is recommended that you change your current password as soon as possible. To change an account password, connect to the internet and point your web browser to this web page.

<http://custsrv.ntamar.net>

What is ISP?

ISP stands for Internet Service Provider. An ISP is what allows you to dial into a network and connect to the rest of the backbone of the internet.

Extended LAN Local Area Network

LAN is a computer network that covers a small area. Most LANs are limited to a single building or group of buildings. However, one LAN can be connected to other LANs over any distance via telephone lines. The main purpose of the link or connection is to transfer data or share information.

Internet Access Worldwide

The Marshall Islands National Telecommunications Authority now have a new solution to simplify the way you use the internet when traveling. Now with your ntamar.net account, you can have access to your emails and send email when you're off island. To do this just simply go to this URL address: tilmake.ntamar.net and type in your username and password.

E-Links

This is a point to point radio system that provides wireless services. It has a capacity of 512 kbps bandwidth which contains 2 telephone lines and Internet Access of 384 kbps bandwidth. Maximum speed for Internet Access is 384 kbps but should customer need an internet speed less than 384 kbps, NTA can also accommodate. Customer will not require any equipment other than telephone equipment and a computer.

NTA provides this service to the remote areas like Gugeeguu, Arno, Rongrong, and the small islets in the Majuro and Ebeye lagoon.
